

SCROLL SAW

- 1. Configuration: a short thin blade held through the table by a long arm
- 2. Cutting Action: the blade reciprocates up and down, cutting on the down stroke
- 3. Adjustments
 - a. The table tilts for bevel cuts
 - The blade can be easily removed and inserted through a hole in the wood to allow trapped cuts
- 4. Cuts: intricate and delicate curves in flat, thin wood
- 5. Safety:
 - a. Watch your fingers
 - b. Make sure blade has teeth pointing down
 - c. Make sure tension is adjusted properly on the blade
 - d. Do not push too hard on wood. You want only enough pressure to maintain good contact on the down stroke, not the up stroke.
